

# TEXTURE

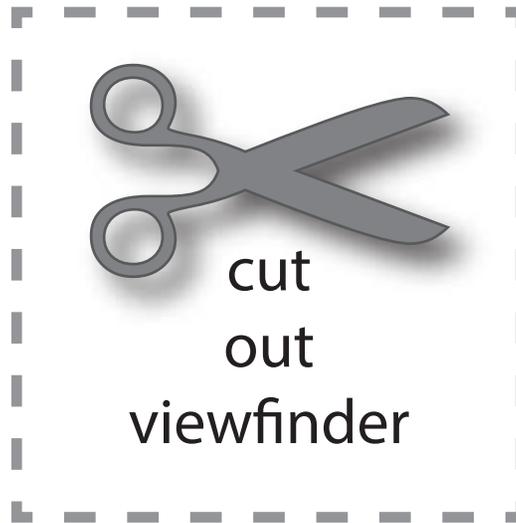

The way an object looks & feels; such as rough, prickly, smooth, or fluffy.

Texture is an element of art.

## Real TEXTURE

When an object feels just as it looks. It looks bumpy & feels bumpy when you touch it.

*Example:* a tree that you can touch.

## Implied TEXTURE

When an object looks bumpy, yet it is actually smooth. It has the illusion of being something that it is not.

*Example:* a photo of a tree.

Why is texture important in your artwork?
